**MK-4 Chemical Aerosol Projector:** The MK-4 unit is the standard for law enforcement personnel. It fits comfortably on an officer's duty belt while giving the officer a respectable amount of controlling force. The Flip Top indexes for directional holding, aiming, and firing for easier target acquisition. The Fog and Vapor Delivery Systems are great for engaging one or multiple individuals because of its wide dispersal pattern. The Ballistic Stream Delivery System can engage small groups as well, yet can target specific individuals because of its improved accuracy. Each System gives its operator a tactical advantage when controlling force is needed. It is perfect for prisoner cell extractions, controlling small crowds, pre-entry, and area denial situations.
