MK-3 Chemical Aerosol Projector: The MK-3 unit is a small and compact less-than-lethal option that holds enough controlling force for every day carry. The Flip Top indexes for directional holding, aiming, and firing for easier target acquisition. The Fog and Vapor Delivery Systems are great for engaging one or multiple individuals because of their wide dispersal pattern. The Ballistic Steam Delivery System can engage small groups as well, yet can target specific individuals because of its improved accuracy. Each system gives its operator a tactical advantage when controlling force is needed. It is perfect for prisoner cell extractions, controlling small crowds, pre-entry, and area denial situations.

Formulation: Oleoresin Capsicum (OC) combined with a **Non-Flammable carrier**. Guardian Protective Devices™ sprays are safe for use with Electro Muscular Disruption (EMD) technology, such as Taser™. UV dye added for easy identification, putting the subject at the scene of incidence.

OC + CS blends are available, custom blends upon request to meet your department requirements.

Safety: The Flip-Top has a protective, spring-loaded, plastic safety cover. The integrated safety cover prevents accidental discharge and conveniently moves out of the way for unobstructed access to the actuator when used.

Labeling: All canister labels are wearing water-resistant and contain the following data:

- Individualized Serial Numbers
- Active Ingredient
- Date of Manufacture
- Date of Expiration
- Lot / Batch Number
- Stock Number
- Decontamination Instructions

Packaging: Department of Transportation (DOT) approved commercial packaging.

 Made in the USA.
D.O.D. approved facility.
